Faizan Parvez

DevOps & Cloud Engineer | AWS Certified Cloud Practitioner

Greater Noida, India | 7004663713 | faizanparvez30@gmail.com | LinkedIn | GitHub | Portfolio

Immediate joiner

PROFESSIONAL SUMMARY

Early-career DevOps and Cloud engineer with 10 months of experience supporting release-quality operations at Nothing Technology Limited. Hands-on across the full DevOps loop: Terraform on AWS, CI/CD and GitOps with GitHub Actions and ArgoCD, Kubernetes with Helm, and Prometheus/Grafana plus CloudWatch monitoring with automated incident alerting. AWS Certified Cloud Practitioner; IEEE Xplore publication on cloud resource allocation.

TECHNICAL SKILLS

AWS	EC2, S3, VPC, IAM, CloudWatch, SNS, EBS, DynamoDB, boto3
IaC & GitOps	Terraform, HCL, Helm, Kubernetes manifests, ArgoCD, YAML
CI/CD	GitHub Actions, Jenkins, GitLab CI/CD, Azure DevOps
Containers	Docker, Kubernetes, Minikube, HorizontalPodAutoscaler
Observability	Prometheus, Grafana, CloudWatch alarms and dashboards, SNS alerting
Languages	Python, Bash/Shell scripting, Java
Tools & OS	Git, GitHub, Linux (Ubuntu), Jira, VS Code
Concepts	CI/CD, Infrastructure as Code, GitOps, container orchestration, monitoring, incident response, networking (subnets, routing, security groups), SRE basics, Agile

PROFESSIONAL EXPERIENCE

Project Administrator Trainee | Nothing Technology Limited Mar 2024 - Dec 2024

Gurugram | Hybrid

- Coordinated testing and feedback workflows across 20+ beta users and cross-functional teams for smartphone and IoT releases; documented and triaged 100+ critical bugs.
- Designed and maintained testing dashboards and status reports, supporting 100% on-time delivery across assigned project milestones.
- Collaborated with agile teams on integration, issue resolution, and release-quality processes, contributing to stable product delivery.

PROJECTS

Kestra Blueprints (22 merged) | kestra-io/blueprints Oct 2026

- 22 blueprints merged into kestra-io/blueprints — K8s watchers (Crony, PodPulse, CertWatch, DeploymentWatch, PVCWatch, JobWatch, ImageWatch, EventWatch, PendingWatch, StuckJobWatch, HelmDriftWatch, QoSWatch), janitors (JobJanitor, BranchJanitor, ConfigJanitor, NamespaceJanitor), utilities (API Health Monitor, Clusterify, ReleasePulse, BumpPilot, dockerDash, PipAuditWatch); all runtime-verified with demo videos, 4 in Kestra's gallery.

PulseDeck: Public Uptime & Status Dashboard | Live | GitHub Sep 2026 - Present

- Operate a live status page over 5 production and third-party endpoints: a scheduled GitHub Actions prober records reachability, latency, and HTTP status; the dashboard reports the measured probe cadence (about 6h on the free scheduler).
- Store all monitoring data in git (rolling samples, daily aggregates, incidents on an orphan data branch); the Next.js site fetches live state at runtime, so the dashboard stays current with zero rebuilds per probe.
- Automated incident management: up-to-down transitions open a GitHub issue, recovery closes it; public incident log, per-service 90-day history and latency charts, and a JSON status API.

DeployWatch: GitOps Deployment Pipeline | GitHub May 2026 - Present

- Built a zero-touch GitOps pipeline: GitHub Actions runs tests, builds versioned Docker images, and updates a Helm chart; ArgoCD auto-syncs to Kubernetes with self-healing and automatic rollback.
- Engineered observability with Prometheus and Grafana; configured liveness/readiness probes and HorizontalPodAutoscaler for self-healing, resilient workloads.

CloudForge: AWS Infrastructure Automation | GitHub Apr 2026 - May 2026

- Provisioned AWS infrastructure with Terraform across 4 modules (networking, compute, storage, monitoring): custom VPC with multi-AZ public subnets, EC2 with IAM role-based access, encrypted EBS and S3.
- Implemented S3 remote state with DynamoDB locking; configured CloudWatch alarms, SNS email alerts, and a live dashboard; automated instance setup with Bash user data.

EDUCATION

B.Tech, Computer Science 2021 - 2025

Galgotias University, Greater Noida | CGPA: 8.68

PUBLICATION

Real-Time Load-Aware Resource Allocation in Cloud Systems

IEEE Xplore | Accepted Feb 2026 (in press)

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** (2026 - 2029)
- **AWS Academy: Cloud Architecting**
- **AWS Academy: Microservices and CI/CD Pipeline Builder**

ADDITIONAL

Hacktoberfest 2022 contributor (code reviews, docs, bug fixes) | Solved 100+ LeetCode problems (arrays, trees, dynamic programming)
